Privacy Impact Assessment- Public Space Surveillance Cameras

The privacy impact assessment (PIA) is recommended in the surveillance camera code of practice issued by the Surveillance Camera commissioner, in accordance with section 30(1) (a) of the protection of freedoms act2012. The purpose of the PIA is to ensure that privacy risks are maintained while allowing the aims of the project to be met whenever possible.

CCTV can be privacy intrusive, as it is capable of putting many law abiding people under surveillance recording their movements as they go about their day to day activities.

We must take into account what benefits are gained, whether other solutions exist, and what effect it may have on individuals.

These matters should be considered objectively as part of an assessment process on people's privacy when considering the deployment of CCTV cameras.

We will use the results of the impact assessment to determine whether CCTV is justified in all the circumstances and if so how should it be operated in practice.

Name: Wayne Bluck	Date: 15/04/19	
Position: Senior Officer	Organisation: RCT	
Camera Number/s 1-41	Location/s: Bridge St/Taff St/High St/Sardis Rd Gas Rd Car Park MSCP Berw Rd Sardis Rd Car Park Sardis House .	

1. Why is your organisation considering the use for using CCTV?

x	Crime and Disorder	x	Antisocial Behaviour	x	Hate Crime
x	Youth Annoyance	x	Licensing Offences	x	Security Issues
Other		Public protection Traffic monitoring			

2. What are the benefits to be gained from the use of CCTV?

x	1.To detect crime	x	5.To reduce crime and disorder
x	2.To Reduce the fear of crime	x	6.To Provide evidence for the criminal justice system
x	3.To Reduce traffic congestion and improve road safety	x	7.To provide evidence for civil proceedings
x	4.To Assist with gathering intelligence	x	8.Other

3. Can CCTV realistically deliver these benefits?

1. Yes	2. Yes	3. Yes	4. Yes	5. Yes	6. Yes	7. Yes	8. Yes
--------	--------	--------	--------	--------	--------	--------	--------

4. Can less privacy intrusive solutions such as improvised lighting achieve the same objective?

No	Lighting has improved in the area, however this only assists the CCTV System. No other long term solution is available to provide security and public/community safety.
----	---

5. Do your organisation need images of identifiable individuals/vehicles?

Yes	The system is capable of delivering high quality images, in compliance with regulations and produce sufficient evidential images for use of prosecuting bodies.
-----	---

6. What are the views of those who will be under surveillance?

Names and addresses of residential premises that oppose the use of CCTV:

Name:	Address:
	<i>Local business and residents in the area were consulted!</i>
	<i>There were no objections to the town centre Public space surveillance system:</i>
	Additional consultation with SWP and local councillors formed part of the process. Direct consultation was restricted to residents who responded. Local businesses including private letting agencies were also consulted. Camera locations are assessed annually on the basis of current public expectations and perceptions. For example if cameras are installed in an area where there is a vibrant night time economy and have been in position for many years we will not seek public consultation but <i>will</i> fully assess them to ensure they are still fit for what is deemed their original purpose.

7. Will the system deliver the desired benefits now and remain sustainable for the future?

Yes: The system is maintained and updated to ensure continued high quality service

8. Is CCTV proportionate to the problem?

Yes

9. Is it justified in the circumstances?

Yes.

10. Is it necessary to address a pressing need, such as public safety, crime prevention or national security?

Yes

Images are required to be able to identify individuals who commit any breach of the scheme/s objectives and can be used for prosecuting bodies.

11. What could you do to minimise intrusion for those that may be monitored particularly if specific concerns have been raised?

Alter stop and rest positions to accommodate.
Privacy zones on cameras where required.

12. Is the proposed camera deployment on a proper legal basis and operated in accordance with the law?

Yes

All CCTV images are controlled under current legislation in accordance with the Data Protection Act 2018 and all data movement is fully documented. Organisations are not limited to the police and can include other bodies with enforcement powers, (such as customs and excise and some council departments)

The scheme owners will maintain policies and procedures to meet the requirements of
